

# CALMAN STUDIO

## MONITOR CALIBRATION SOFTWARE

Guaranteed color accuracy for production and broadcast.

### Complete Solution

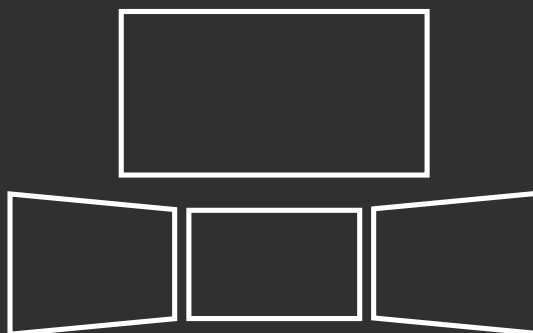

Handles the wide variety of configurations throughout the production and post workflows.

### Measurement

Measure the unique color performance and video output of any monitor.

### Testing

Test against industry standards like Rec.709, DCI/P3 and Rec.2020.

### Profiling

Capture your monitor's unique color output for use in corrective 3D LUTs.

### Calibration

Calibrate your monitor's video output to selected color standards.

### Reporting

Print detailed reports with measurement charts and calibration results.

### Automated Profiling

Profiling and analyzing the color performance of a monitor is fast, automated and highly accurate for your specific needs for better efficiency.

### Advanced 3D LUTs

CaIMAN provides the latest, most advanced technology for creating corrective 3D LUTs and is faster and more accurate than any other calibration software.

### Hardware Integration

SpectraCal works closely with its industry partners to provide easy calibration solutions that integrate seamlessly with existing devices and applications.

# CALIBRATION SETUP

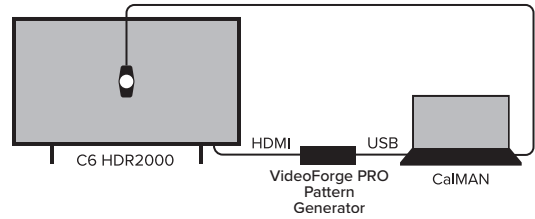

## BROADCAST OR CLIENT VIDEO MONITORS

- Calibration Software - CalMAN Studio
- Colorimeter - C6 HDR2000
- Pattern Source
  - VideoForge PRO (hardware) or
  - VirtualForge (software)

### BROADCAST MONITOR USING SOFTWARE PATTERN SOURCE

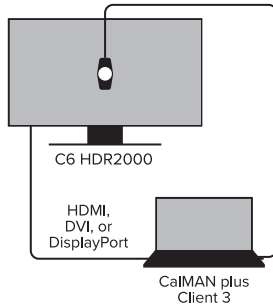

### CLIENT MONITOR USING HARDWARE PATTERN GENERATOR

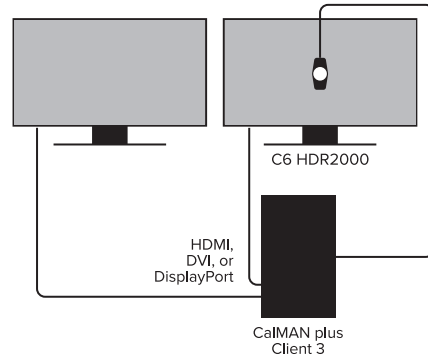

## COMPUTER RGB MONITORS

- Calibration Software - CalMAN Studio
- Colorimeter - C6 HDR2000
- Pattern Source - Client 3 (software)

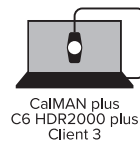

### SINGLE CONNECTED MONITOR

### MULTIPLE CONNECTED MONITORS

### LAPTOP SCREEN

### REMOTE CALIBRATION OVER A NETWORK
