

SPECTRACAL VIDEOFORGE PRO

STANDALONE TEST PATTERN GENERATOR

Reference 4K/UHD HDR HDMI test patterns for CalMAN calibration software.

Leading-Edge Technology

HDCP 2.2, HDMI 2.0(a),
UHD resolutions up to 60p,
BT.2020 (RGB output),
up to 12-bit deep color

Reliable Patterns

Accurate, reliable video
test patterns for precise
color measurements.

Rugged Construction

Built for daily use by
demanding professionals.

Compact Design

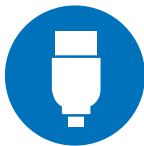

Compact and lightweight—
only twelve ounces! Fits just
right in your hand.

Integrated Battery

Includes a rechargeable
battery for one less cable
during calibration.

Fast Automation

Completely automated
with CalMAN software for
fast pattern generation.

4K/UHD HDR HDMI Output

The VideoForge Pro outputs
highly accurate, reference-level
video test patterns via HDMI
and supports resolutions up to
4096 x 2160 @ 60 Hz.

RGB Triplets

Dynamically generates any color
patch requested by CalMAN
on the fly, including, grayscale,
gamut, saturation sweeps, and
3D LUT calibration patches.

HDR10, HLG, and Dolby Vision Support

Contains the very latest HDR
and UHDTV technology.
